

*****ROOSEVELT RESIDENTS*****

The Borough has contracted with Northeast Water Technology to conduct a Water Leak Detection Survey. They will be using electronic equipment to listen on fire hydrants, street valves and individual curb stops for some houses. Their vehicles are clearly marked with the company name and have full emergency lighting for night time work. They are expected to be in Roosevelt 5/30/23 and 5/31/23 and will begin at 7 am, depending on weather and traffic conditions.
