

MESSAGE FROM JCP&L 6/1/19

JCP&L's contractor, Davey Tree will begin work in approximately 2 months on JCP&L's Reliability Plus enhanced vegetation management program. Attached is a list of streets where both normal and enhanced work will be performed. Davey Tree has been requesting permission from customers and/or municipalities to remove branch overhangs (and/or trees that may become suspect based upon the overhang removal) along our primary wires as part of **JCP&L's Reliability Plus** enhanced vegetation maintenance work. This work to remove overhangs around distribution facilities is not part of our normal tree trimming. Customers will be permissioned first and upon approval, overhangs removed accordingly.

Additionally, JCP&L will be performing our normal trim work on these same streets. Please share this information with elected officials and as appropriate.
